## **Short reel/tiktok script suggestion coming from people in a ballot initiative state on why they support the ballot initiative to protect abortion**

I'm in an abortion ballot initiative state, and let me tell you why I support protecting abortion rights through this initiative. This is not just about politics; it's personal. Every person should have the right to make decisions about their own body and future. By supporting this initiative, we stand up for reproductive rights and gender equality. Let's make sure everyone has the freedom to know-what's best for them!

If you are looking for ways to help fight for access to abortion in the U.S., check out this toolkit from Amnesty International USA full of specific ways to stand up for reproductive rights in your community.

This toolkit includes information on:

- Signing petitions
- Trainings to collect signatures
- How to connect with local organizations leading the ballot initiative in your State
- How to get involved in your community
- How to talk about abortion
- Organizing advocacy groups on your college campus
- And staying informed about the facts about abortion

## **Short reel/tiktok script coming from people not in ballot initiative states on why protecting abortion is important and that they stand in solidarity with those states**

So, even if we're not in one of those abortion ballot initiative states, it's crucial to talk about why protecting abortion rights is so important.

Protecting abortion rights is crucial because it upholds an individual's autonomy and bodily integrity. When individuals have access to safe and legal abortion services, they can make decisions about their own bodies and lives allowing individuals to control their futures and make decisions that are best for them.

We stand in solidarity with those states fighting for our ability to make our own decisions about what happens with our own bodies. Everyone should have the right to make decisions about their own lives. Let's support each other in this fight for bodily autonomy!
